

AMSEC® WS1814

AMSEC's new WS1814 electronic burglary resistant wall safe offers a unique modular interior to organize valuables and hanging file documents for safe hidden storage. Best of all, the WS1814 wall safe offers the AMSEC 5BE electronic lock for quick easy access and an expandable interior for installation between 16" o/c (2x4 or 2x6) wall studs.

Outstanding Features

- AMSEC 5BE electronic push button lock is fast and easy to use
- Solid steel construction with a 3/16" pry-resistant door offers excellent burglary protection
- Built-in enhanced LED interior lighting is activated when door is opened
- Desktop door design provides a convenient workstation
- Comes standard with two storage shelves or one shelf with hanging file rack

Designed with Security Monitoring Alarm Contacts

- An Open Door Signaling feature provides an output signal whenever the door is in the open position, so that an Alarm System can notify the user or a monitoring service that the safe is unlocked
- A Silent Signal Alarm feature allows the user to secretly signal a monitoring service that an intruder is in the home
